

GREENSBORO TELEGRAM.

VOL. VIII. NO. 3.

GREENSBORO, N. C., WEDNESDAY, FEBRUARY 13, 1901.

Price Five Cents

THE WEATHER.

For North Carolina: Fair tonight and Thursday, fresh northwest winds. Highest temperature for the past 24 hours, ending 8 o'clock this morning, 49, lowest 25.

PERSONAL MENTION.

Mr. W. T. Powe spent the afternoon in Burlington.

Mr. Carl Wheeler went to Raleigh this afternoon.

Mr. Paul Welsh returned last night from a week's visit in Siler City.

Mr. W. P. Mangum Turner went to Hillsboro this afternoon on insurance business.

Mr. Edney Ridge, who has been at home sick some time, has returned to school at Oak Ridge.

Mr. R. G. Stockton left yesterday for Ojas, Florida, where he goes to make his home for the present.

Mr. and Mrs. Robert Mebane, of Graham, are visiting Mr. Mebane's parents on Ashe street.

Capt. Z. B. Vance, of Charlotte went to Madison this morning on a short business trip.

Mr. Elmer Leak returned this afternoon to Guilford College. He has for several days been on the sick list at home.

Mr. A. G. Brooks, of the Brooks Lumber Company, at Pateam, spent today in the city visiting friends and looking after business interests.

Judge and Mrs. James E. Boyd went to Durham this morning to attend the funeral of Mr. J. T. Mallory, whose death occurred in that city yesterday.

Miss Maud Hunter left last night for New York City where she will study vocal music under the celebrated teacher Madame Von Clenna. She was accompanied by her father, Mr. J. S. Hunter.

Rev. W. L. Grissom, who has been in poor health for several weeks, left on the noon train for Baltimore, to enter Johns Hopkins Hospital. He was accompanied on the trip by Mr. C. H. Ireland.

Miss Mary Kennett, of Raleigh, spent last night in the city and this morning went to High Point. She will act as one of the bridesmaids in the Diffe-Retzell marriage which occurs there tomorrow.

The claim of other cough medicines to be as good as Chamberlain's are effectually set at rest in the following testimonial of Mr. C. D. Glass, an employe of Bartlett & Dennis Co., Gardner, Me. He says: "I had kept adding to a cold and cough in the winter of 1897, trying every cough medicine I heard of without permanent help, until one day I was in the store of Mr. Houlehan and he advised me to try Chamberlain's Cough Remedy and offered to pay back my money if I was not cured. My lungs and bronchial tubes were very sore at this time, but I was completely cured by this remedy, and have since always turned to it when I got a cold, and soon find relief. I also recommend it to my friends and am glad to say it is the best of all cough medicines." For sale by C. E. Holton.

Like bad dollars, all counterfeits of DeWitt's Witch Hazel Salve are worthless. The original quickly cures piles, sores and all skin diseases. Howard Gardner.

A FRIGHTFUL BLUNDER.

Will often cause a horrible burn, scald, cut or bruise. Bucklen's Arnica Salve, the best in the world, will kill the pain and promptly heal it. Cures old sores, fever sores, ulcers, boils, felons, corns, all skin eruptions. Best pile cure on earth. Only 25 cents a box. Cure guaranteed. Sold by C. E. Holton.

Millions of people are familiar with DeWitt's Little Early Risers and those who use them find them to be famous little liver pills. Never gripe. Howard Gardner.

PIANOS.

"In the World's Fair at Chicago in 1893 the 'Malcolm Love' was awarded a diploma, having been brought into competition with most of the high grade pianos made in the United States."—Buyer's Guide. For sale by W. H. Eller.

New Hotel at Jackson Springs.

Mr. W. C. Bain, the well known contractor of this city, has just closed a contract to build a big hotel at Jackson Springs, in Moore county. This place has been a resort for a long time, but has never been developed. Since the railroad has entered there it has fallen into the hands of some men of means who propose to open it up to the best advantage. The hotel will be four stories, one hundred feet long, with all the modern improvements. Work will probably be begun in ten days.

Mr. Bain built the big hotel at Pinehurst.

The Durham Wedding.

A happy wedding was solemnized at 9:30 o'clock today at the home of the bride's parents, Mr. and Mrs. J. M. Sykes. The contracting parties were Mr. O. Joseph Howard, of Pomona, to Miss Celestia Hunter, of this city. The ceremony was performed by Rev. L. Johnson, Secretary of the Baptist Foreign Mission Board. The groom and his bride left on the west bound train, bearing with them the hearty congratulations and best wishes of all their friends.

May Lose Another Minister.

Greensboro may be so unfortunate as to lose another one of her popular ministers. Rev. Horace Weeks Jones, rector of St. Barnabas church, has just received a call to St. John's Parish, New Decatur, Ala. He leaves tonight to spend a week there, and will decide regarding the matter when he returns.

Call Accepted.

The Rev. Sanders R. Guignard, who preached at St. Andrew's church two weeks ago, has accepted the call extended to him by the vestry of that congregation, and will enter upon his duties soon after the 1st of March.

A Card.

Myself and family wish to express our sincere thanks to friends and neighbors who showed their untiring kindness and sympathy in our recent great bereavement.

Respectfully,
M. G. NEWELL.

LOCAL ITEMS.

Mr. T. K. Renniger, who is preparing to open a bar in the old express office building, will open Saturday morning.

After a sermon by Rev. C. O. Ceall, Rev. W. R. Lowdermilk, will be ordained at Grace Methodist Protestant Church tonight.

Mr. W. A. Chisholm, of the L. Richardson Drug Co., who has been suffering from an attack of the grip, is able to be out again.

Revival services are being held at the Jonesboro M. E. Church, colored, by Evangelist Rev. M. E. Collett. Considerable interest is being manifested.

Mr. David Lundie received a letter this morning stating that the condition of his brother, Mr. W. Y. Lundie, of Petersburg, Va., who is seriously ill with pneumonia, is somewhat better.

A special to the Charlotte Observer says that Col. Leftwich of Greensboro was yesterday presented to President McKinley by Senator Pritchard and laid before him strong endorsements of himself for a consular position.

Miss Vera Kirkman entertained the Jolly Girls Club last evening at Mrs. W. R. Patterson's, on Walker avenue. After many games, delicious refreshments were served. The guests departed at 10:30, each having had a most delightful time.

Jno. B. Wright, the piano man, has a new ad on page five of today's issue.

J. W. Scott & Co. want to sell you cigars—Santiago Crooks, for instance.

Harry-Belk Bros. Co. continue their sale of linens tomorrow. See page five.

Greensboro Table Company are talking about mantles direct from the maker to the consumer.

FOR COMPULSORY EDUCATION

MR. WHITAKER INTRODUCES A BILL GRANTING ELECTIONS.

Provides That on Petition of a Majority of the Voters of Any City, Town, County or Township, the Commissioners Shall Order an Election on the Subject.

Special Dispatch to The Telegram. Raleigh, Feb. 13.—Mr. S. M. Gattis was elected speaker pro tem. of the House and presided today.

Representative Whitaker, of Guilford, introduced a bill making it possible for communities desiring it to enact, by vote, a compulsory educational law.

It provides that on petition of one third of the qualified voters of a township, county, town or city, the county commissioners shall order an election on compulsory education. If a majority votes for it, all children between the ages of twelve and eighteen, shall attend public school, unless educated by other means, until they can read and write any section of the constitution.

Bills were introduced incorporating a State Veterinary Association, and to prevent the sale of liquors to minors.

Bills passed requiring all executions to be private and requiring the State Board of Agriculture to be composed entirely of practical farmers, to provide that no indictments begun under an election law unless it is begun thirty days after the offense shall be prosecuted to conviction. This is an amnesty act to Republicans and Democrats.

The Patriarch's Ball.

Very fortunate were those who today found this invitation in their mail: You are respectfully invited to attend the Patriarch's Ball, At the McAdoo House, Friday Evening, February 15, 1901. Dancing from 9:30 to 2.

Chief Ball Manager, Mr. L. C. Howlett.

Assistant Ball Managers, Dr. Chas. L. Scott, Messrs. Robt. D. Douglas, Templar S. Horry, Clarence N. Cone. Committee on Invitation, Messrs. W. Giles Mebane, H. S. Bradley, Howell Fry.

Honorary Ball Managers, Judge James E. Boyd, Messrs. N. J. O'Brien, S. L. Gilmer, L. F. Woodruff, John J. Nelson, Caesar Cone, Dr. Geo. A. Mebane.

Patronesses, Mesdames Geo. A. Mebane, Caesar Cone, Annie Cator, Enrest A. Holt, J. W. Menefee.

The Long Suit.

Mr. B. F. Long, of Statesville, has instituted suit against the Southern for \$275,000 damages for the killing of his son at Chapel Hill. The case is now on trial in Iredell county. The circumstances of the case are thus recalled by the Durham Sun:

Young Long was a student of the University of North Carolina, at Chapel Hill. On Thursday, November 16th, 1899, he was on his way to Raleigh to visit his father who was then attending Supreme Court. While at University Station he started out to board the train from Greensboro, and in doing so had to cross the sidetrack. The Chapel Hill train was pushing a box car ahead of it, and this car struck Long, knocked him down and pinned him beneath it. The car had to be jacked up in order to get the young man out.

The young man was brought to Watts Hospital in Durham, where he was attended by some of our leading physicians. Death came to his relief that night. The remains were interred in Statesville.

Masonic Notice.

There will be a regular Communication of Greensboro Lodge No. 76, A. F. and A. M., at 8 o'clock, Thursday evening, February 14th. Visiting brethren will be welcome.

J. D. GLENN,
W. T. GAYLE, Secretary.

Telegraphic Briefs.

Mrs. Thomas C. Platt, wife of the Senator, died this morning at the Fifth Avenue Hotel, New York.

This was the coldest morning of the season in New York from 9 to 12 o'clock.

At McDonald, Pa., last night, 400 persons came near being caught in a fire which consumed the opera house. There were thrilling escapes, and the firemen and volunteers had great difficulty in rescuing the women and children.

A special from Cape Town today to London says that A. D. W. Walmerus, the Boer delegate to the United States and Europe writes from Paris strenuously urging the Boers to surrender.

Governor Nash, of Ohio, is determined to prevent the proposed prize fight of Jeffries and Rublin, scheduled to take place Friday night at Columbus. Ten companies of the Ohio National Guards have been ordered to be in readiness to go to the scene Friday morning.

A London dispatch from Sham-Kwan, dated the 11th, says that the Russians lost forty-two men in an engagement at Kwo-Chioo.

One man was killed and six wounded this morning in a conflict between the police and an anti-clerical mob at Saragossa, Spain.

Social.

The Social Card Club met yesterday afternoon with Mrs. Cornelius Mebane at her home on Ashe street. Thirty-two ladies were present and enjoyed the afternoon. Progressive euchre was played and the prize, a pincushion in the shape of a doll, was won by Mrs. J. C. Bishop.

Mrs. M. L. Shields will entertain the Social Card Club Saturday afternoon at 3:30 o'clock.

Cards are out announcing the marriage of Mr. James H. Holt, of Burlington to Miss Olive E. Joyner, at the home of the bride in Baltimore on Wednesday, February 27th.

Marriage of a Former Greensboro Man.

Mr. A. H. Galloway, Jr. and Miss Mary E. Gray were married last night at the home of the bride's parents, Mr. and Mrs. James A. Gray, of Winston. After the ceremony a reception was tendered the bride and groom. About two hundred guests were present at the reception.

Mr. and Mrs. Galloway arrived in this city on the early morning train and left on their way to northern cities at noon.

They will return to their future home in Winston about February 23d.

Mr. Galloway is well known in Greensboro, he having held the position of bookkeeper in the old Piedmont bank for several years, and has many friends here.

Marriage.

Mr. R. S. Pierce and Miss Mollie Atkinson were married at the residence of the bride's mother, Mrs. E. J. Atkinson on Asheboro street, last night at 8 o'clock.

Only a few friends were present, it being a quiet affair. The ceremony was performed by Rev. J. A. Hackney, pastor of Cherry Street Baptist church.

Mr. Pierce is connected with the Gate City Bakery. His bride is well known here and her many friends wish for her much happiness.

A New Machine.

The Greensboro Table Company have just put in a new machine, a variety saw, so named because of the variety of work that can be done with it. It is the latest make and will cut at any angle. Bevel work can also be turned from this machine.

The saw revolves very rapidly, making fifty revolutions each second. It is a very pretty machine in operation and its owners are proud of it.

WHAT CINCH WAS FISHING FOR

The Unexpected Answer That Came As a Question in a Volunteer Regiment in Camp.

Some young men who enlisted during the war with Spain but never saw any active service were talking over their days in uniform one night last week, and told interesting stories of camp life, says the Chicago Inter Ocean. The young man who had been a hospital steward told this story:

"A month in our camp in Georgia was enough to drive a man to despair, for not only was it hot, but every day increased our belief that the government had no intention of giving us a chance to get into action or of letting us go back to our homes. As a hospital steward I used to hear a good deal about the health of the regiment from the surgeons, and one day I was very much surprised to hear one of them say that he was afraid Cinch, of company C, was going to lose his mind. I knew Cinch as a big, good-natured fellow, who tried to get a discharge as soon as he learned that we were not going to have a fight. When he failed he became sullen and moody. The more we watched him the more convinced we became that something was wrong with him. Every time we came around we found him mumbling to himself, and one day a crowd of us found him seated on a stump in the middle of a big clover field, holding in front of him a long pole, attached to which was a piece of cord, on the end of which was a pin bent to resemble a fishhook. He would drop the hook into the long grass and let it stay there for a time. Then he would make a cast and when the hook fell would sit and watch the end of his line intently. Every once in awhile he would jerk the line out of the grass as though he had felt a nibble. Once one of the boys stepped up and said: 'What are you fishing for?'

"He got no answer. All Cinch did was to turn a pair of hollow eyes on him and then resume his fishing. After that a gang used to go out and watch Cinch every afternoon. They would hide in the grass and almost burst with laughter at the seriousness with which the poor fellow would cast his line of wrapping cord and his pin hook and then sit and wait for a bite. Every once in awhile the boys would saunter out and say:

"What are you fishing for, Cinch?" "It got to be the regimental saying, and I suppose that the question: 'What are you fishing for, Cinch?' was thrown at the man from company C a hundred times a day. By and by the news got to the officers that Cinch was going fast. They heard about his fishing in the fields, and one day the sergeant major went out and witnessed the performance. He went back and reported to the colonel that unless Cinch was discharged at once he would be hopelessly insane. The result was that his condition was telegraphed on to Washington and discharge papers were returned at once.

"The colonel in the goodness of his heart went to look up Cinch and give him the news. He found him sitting on a stump in the field fishing away, while around him sat about 50 of the regiment, one of whom would yell: 'What are you fishing for, Cinch?' every few minutes. The colonel stepped up, and, touching Cinch on the shoulder, said: 'Cinch, we think your health demands that you leave the service, and so we have procured an honorable discharge for you. Here it is, and he handed Cinch the papers.

"Cinch dropped his fishing pole and grabbed the papers. He gave one look at them, and when he saw that they were all right waved them triumphantly over his head and shouted at the top of his voice:

"This is what I was fishing for, dang ye all; this is what I was fishing for, and I got it, too, and with that he went dancing over the field, leaving us standing there, the first gleam of the truth creeping into our brains.

"The colonel looked foolish, and by and by we began to sneak away one by one. There was no doubt that the regimental question: 'What are you fishing for, Cinch?' had been answered, and in a most emphatic and surprising fashion. Cinch was as sane as anybody, but when he found he couldn't get an honorable discharge in one way he tried for it in another."

A warehouse which has just been built in Oakland, Cal., is to be occupied as a wholesale orange depot. The firm intends to make a decided departure in the orange business as it has heretofore been conducted. It will put in a large orange grader in the warehouse. It then expects to commence the shipment of oranges loose in car load lots, grading and sorting them after they arrive. It is claimed that this will be a great deal less expensive and will result in placing good oranges on the market at a lower price than has ruled in the past.—Detroit Free Press.

THE LIBERAL ARTS.

NOTABLE EXHIBIT TO BE MADE AT
THE PAN-AMERICAN.

Vast Field Covered by the Exhibit
and the Methods to Be Followed in
Its Illustration at the Exposition at
Buffalo Next Summer.

The building which is to house the exhibit in manufactures and liberal arts at the Pan-American Exposition at Buffalo will be one of the most imposing in the splendid group surrounding the Court of Fountains. This building is 500 by 350 feet, with a central court and having a dome 70 feet in diameter over the entrance on the south.

Manufactured products and those illustrating the liberal arts are so closely allied that they naturally are classified in the same general group, and at the great expositions of recent years they have been housed under the same roof. Under the general classification of liberal arts are included such subjects as those of education and social economy, books, periodicals, scientific apparatus, hygiene and sanitation, musical instruments, public works, civil engineering, constructive architecture, photographs and photographic supplies, medical, dental and surgical apparatus and other branches of intellectual activity. Indeed it is the most progressive and noble of the tendencies and achievements of this age of enlightenment and civilization which are represented in the exhibits of this division of a great exposition.

The work of collecting and classifying the Liberal Arts exhibit for the Pan-American Exposition is now well under way and is in charge of Dr. Selim H. Peabody, whose successful handling of the same division at the great Columbian Exposition of 1893 marks him as the best qualified man on the American continent for the discharge of such a task.

The exhibits of the Liberal Arts division as well as those of other departments will be concentrated and representative rather than vast in extent and exhaustive in scope. Most gratifying progress has been made since the World's Fair at Chicago in methods of education in the public schools, universities and colleges of the United States and other Pan-American countries. The educational exhibit will give special attention to exemplifying this great progress and showing the present state of our educational institutions. It is the intention to have models prepared representing the equipments of schools, colleges and universities. The exhibit made by the United States in the Paris exposition will be removed to Buffalo for the Pan-American and will be supplemented with additional exhibits.

Closely related to the educational exhibit will be those in social economy and in hygiene and sanitation. Under the head of social economy will be included such subjects as charities and correction, co-operative associations and trades unions, apprenticeship and child labor, protection of workmen in factories and mines, workmen's dwellings, etc.

The division of sanitation and hygiene is one of great practical importance, and great progress has been made within a decade along this line. Indeed it may perhaps be said that the subject has become almost a science in itself, and certainly in its relations to the daily life of the people its importance cannot be too much emphasized.

The exhibit at the Pan-American Exposition, which is under the immediate supervision of Dr. Jacob S. Otto, an authority in this branch of science, will comprise such subjects as physical culture, and the apparatus used in various institutions for this purpose—hospitals and dispensaries, boards of health—and their functions, foods, their chemistry, preservation and adulteration; mechanical methods of sanitation and sanitary architecture. The improved methods introduced into municipal departments in recent years will be shown as graphically as possible. In many cases models will be used for this purpose. Maps and models showing the disposition of garbage in cities and the cremation of the dead will be features of the exhibit in this division. Sewer drainage will also form an important part of the exhibit. Especially timely, in view of the tenement house investigation recently conducted by a state commission appointed for that purpose, will be the exhibit to be made by the Charity Organization Society of New York City showing the past and present as well as the ideal sanitary conditions of homes in tenement districts of great cities. Of interest in the same connection will be the exhibit showing what is being done in the way of public

National Museum.

The exhibit of the national museum, under the auspices of the Smithsonian Institution, at the Pan-American Exposition will be of absorbing interest. It will display the resources of North, South and Central America, the West Indies and the new possessions of the United States. Representatives of the institution are now gathering an abundance of new specimens.

POULTRY SHOW.

In planning a great Exposition of the magnitude of the Pan-American, to be held in Buffalo next summer, where all the great industries of the United States will be represented by exhibits which will be of the best quality and character that can be produced, the wisdom of the management is shown in the magnificent preparations that are being made for the Division of Live Stock.

In no line of breeding domestic animals has greater strides been made than in the poultry industry, and, while the interest taken in the Live Stock Division of the Exposition by prospective exhibitors is very encouraging, the poultrymen of the United States and Canada are manifesting an interest that is truly phenomenal. The poultrymen in the past few years have seen the industry double many times until today it exceeds in value any single farm crop. The annual sale of eggs, poultry and fancy birds for breeding purposes in the United States and Canada exceeds \$1,000,000,000. The proposed show at the Pan-American will be fully adequate to the great interests involved. The time of this show will be most propitious to the fanciers—Oct. 21-31—and the accommodations will be all that are desired. The stables, covering ten acres, will all be devoted to the poultry and pet stock show.

PAN-AMERICAN SPORTS.

The popular sports of the Americans have been handsomely recognized by the Pan-American Exposition. A Stadium, beautiful in design, with a quarter mile track and ground area ample for the requirements of all the popular events proposed, is provided. It has a seating capacity of 12,000. The nature of the sports planned is varied. Amateur events of all kinds will be particularly encouraged as representing the most desirable of athletic competitions. There will be professional events as well. College sports will be made a feature, and intercollegiate events are being planned. There will be amateur and professional baseball, football, lawn tennis, Marathon race, cross country runs, lacrosse, cycling, basketball, roque, shooting, Caledonian games, gymnastics, military maneuvers, turning, cricket, bowling and other sports.

wise requested.

Take No Substitute for GRIPPE KNOCKERS. They have no Equal. Price 25c.

NO RIGHT TO UGLINESS

The woman who is lovely in face form and temper will always have friends, but one who would be attractive must keep her health. If she is weak, sickly and run down, she will be nervous and irritable. If she has constipation or kidney trouble, her impure blood will cause pimples, blotches, skin eruptions and a wretched complexion. Electric bitters is the best medicine in the world to regulate stomach, liver and kidneys and to purify the blood. It gives strong nerves, bright eyes, smooth, velvety skin, rich complexion. It will make a good-looking, charming woman of a run-down invalid. Only 50 cents at C. E. Holton's drug store.

A powerful engine cannot be run with a weak boiler, and we can't keep up the strain of an active life with a weak stomach; neither can we stop the human machine to make repairs. If the stomach cannot digest enough food to keep the body strong, such a preparation as Kodol Dyspepsia Cure should be used. It digests what you eat and it simply can't help but do you good. Howard Gardner.

EDITOR'S AWFUL FLIGHT.

F. M. Higgins, editor Seneca, (Ills.), News, was afflicted for years with piles that no doctor or remedy helped until he tried Bucklen's Arnica Salve. He writes two boxes wholly cured him. It's the surest Pile cure on earth and the best salve in the world. Cure guaranteed. Only 25 cents. Sold by C. E. Holton, druggist.

CAPTURED THE TOWN

Our Great Challenge Sale, which we inaugurated last month has captured the town. The Genuine Bargains which we are offering have crowded our store during the entire week. Notwithstanding the weather of last week we have been pushed to our utmost to deliver all the goods we have sold. Whilst our competitors are complaining of the weather and dull business, we are doing the Largest Business in our history. No wonder, though, as we are selling good, brand-new this season's goods at much less than asked for elsewhere. If saving money is an object You Cannot Afford to Miss This Sale. Get in the push and join the crowds thronging our store, and you will be convinced that this is the Greatest Bargain Sale ever held in Greensboro. Below we name only a few specimens of the Many More Bargains we are offering.

WEDNESDAY, FEBRUARY 13

Our force is still so short that we are seriously handicapped, and therefore continue to crave the forbearance of our readers.

MAGNET FOR FARMERS.

Great Display in the Division of Agriculture at Exposition.

The prominent display in the Division of Agriculture at the Pan-American Exposition will be the magnet that will attract progressive farmers. Here they can learn what their brother farmers are doing to lighten labor and improve the products of the fields. The exhibit will embrace all phases of agricultural work, showing the advantages of different processes and methods of work and the products of the garden and field in their great variety under all sorts of conditions. Under their proper classifications will be shown methods of fertilization, farm management and processes, experiments with various crops in different soils, climate, etc.; reports from different states and provinces showing the aggregate of crops and products of all kinds; exhibits of all products of the farm and garden. This will be a splendid school of instruction for the farmer.

Race Development.

The Department of Ethnology at the Pan-American Exposition will include a vast museum of archaeological treasures by which the development of the races, particularly in America, may be traced. The Americas have proved to be rich fields which the students have neglected. Rude implements and vessels made by the mound builders, the Aztecs or the Incas many centuries ago and brought to light only in recent years will serve to introduce the first Americans to those of the present day. A rare opportunity will be given to study the progress of man in labor and invention by means of these priceless exhibits.

Removal Sale

I must make room for another business by March 1st. My entire stock for sale at wholesale or retail at reduced prices.

LAND SALE

North Carolina, } In Superior Court
Guilford County, } Before Clerk.

Laura S. Kerr, Executrix of Jno. W. Kerr, deceased, and Hattie C. Kerr, et al. (infants) by their next friend, A. W. Cooke, Ex Parte.

By virtue of the power conferred upon me, and direction given in a certain order of the Superior Court of Guilford county made by the Clerk thereof in the above entitled cause, I will, as Commissioner of said court, sell at the court house door in Greensboro, N. C., on Monday, the 4th day of March at public auction, to the highest bidder, the following described lot and parcel of land situated in the city of Greensboro, and described as follows, viz: One lot located on the north side of West Whittington street, fronting said street 78 feet and running back 148 feet, upon which is situated two houses for residence, one a single room house and the other a double room house, sufficiently far apart as to accommodate different tenants, and adjoining the lands of Henry Williams on the east, F. M. Keith on the west and the land of the petitioners on the north. There is also a fine well of water upon said lot. Terms of sale, one-half cash, the remaining payment to be made in six months, deferred payment bearing interest from date of sale. This the 2nd day of February 1901.

A. L. BROOKS,
Commissioner.

A WORD OF WARNING

When you buy a piano or organ you want a musical instrument do you not? Then beware of those cheap pianos and organs so extensively advertised. Use your own common sense. If a cheap watch could keep accurate time, there would be no demand for the full jeweled and adjusted movement. If a thirty dollar organ or a \$150 piano could be constructed so as to give musical satisfaction and durability instead of being a source of discontent and annoyance, there would be no demand for a more artistic instrument.

Kimball Pianos and Organs are sold direct from their large factories at small factory profit. They are fully guaranteed. We shall be glad to hear from any one desiring a strictly first-class instrument.

GEORGETOWN UNIVERSITY

October 29, 1900.

Mr. John B. Wright, 212 S. Elm St., Greensboro, N. C.:

Dear Sir:—Your letter of the 11th inst., as to how the Emerson piano was liked at Georgetown, was referred to Prof. George Herbert Wells, choir-master at Georgetown. Mr. Wells reports:

"Among the pianos at Georgetown College is an Emerson upright. Its pure, agreeable tone, its easy, responsive action, and its general construction are worthy of commendation." Yours very truly,
L. J. CULLEN,
Secretary.

ARTISTIC WORLD-RENOWNED PIANOS.....

At right prices are what I have for sale. Knabe, Sohmer and Emerson Pianos. Out of these make I can suit the musical people of North Carolina. I also have some medium grade pianos. For Thirty days I ask every human being who thinks of buying, exchanging or making any change in pianos to call—my prices will be the lowest ever known on high grade pianos. Don't listen to anyone, but come or write me. I am known by piano dealers as the closest-priced dealer in the South.

JOHN B. WRIGHT,
Greensboro, N. C.

The Hamner School of Science and Healing, High Point, North Carolina.

False Report.

During the past week or two it has been reported by those who are evilly disposed, that Professor MacKnight, of the Hamner School of Science and Healing, had left High Point for parts unknown. We are heartily glad that such people, who are only a stumbling block to decent people, persist in giving us free advertisement, and hope that they will keep right on in their same old way, because every time they manufacture such infamous lies they not only make us new friends, but brand themselves with that degree of infamy that is appropriate to them only.

We desire to say that we are here to stay, have instituted a school, and we will, in the future, not only heal all those suffering with all forms of chronic disease, but teach others to do the same. It is easy to cure disease without medicine or the surgeon's knife. We have no use for them; we have had our day with medicine, and we now have something better. Professor MacKnight is not the only Doctor of Medicine who has dropped it and took up the new. Hundreds of the best Doctors of Medicine through the North and Northwest have abandoned the old for the new. All the broad and liberal-minded doctors do not hesitate to make the change. And it is a recognized fact in the history of all sciences, that those who are the last to drop the old and take up the new are always the narrow-minded ones. Medicine has seen its day! Since it has been in use the death rate has increased many fold and disease by scores of different kinds has made its new appearance. An increase in disease and its fatality, an increase in death rate as the "science" of medicine grows older, does not speak very well for its utility.

We have the new and we enjoy a nice, liberal patronage of patients, many of whom were terrible sufferers and all of whom are improving.

Our cure for consumption is a settled fact. Come and try our treatment for any kind of trouble you may be suffering with and you will join us in saying that the old must go for the new, because the new is the best.

THE HAMNER SCHOOL OF
SCIENCE AND HEALING.

A Card.

Editor Telegram:—Owing to the large number of letters I have received from persons far and near making inquiry of the condition and improvement of little Daisy Beam, of whom was published a statement of her case in your paper of January 4th, I desire to say that time will not permit me to answer these letters individually; therefore I will publish in your paper every two weeks a statement of her condition and improvement. This will enable these scores of inquirers to keep track of the case. Its equal has never been known so far we have been able to learn.

Since January 4th I have given her three treatments, the same as then published. Her head is now one fourth inch smaller than it was then. For a girl of her age and weight her head is now nearly normal. I anticipate her head will fall much below normal when it reaches its minimum size, because of it having never been properly developed. Where this minimum is cannot even be estimated with any degree of accuracy. The child has committed to memory, from dictation, every

word of "Old Mother Goose" and "Ten Little Niggers" and recites them without error.

On the 14th inst. she, with the assistance of only the tip of one of my fingers, raised her left little hand to her face and rubbed her nose with it. This is the hand that was paralyzed when but three years old, and never before in her life did it touch her face. It was drawn tight to her side and never developed any. She has now only had one very light convulsion in these weeks. The rest of her condition is as when written about on the 4th instant.

Mr. and Mrs. Beam are delighted with the results and anyone may call and see the child. Scores of people have seen her in the last two weeks, and many from a distance.

Yours truly,

HARRY MACKNIGHT,
Professor of Psycho-Therapeutics,
Hamner School of Science and
Healing.

Consumption—Its Cure an Established Fact.

Mrs. Cyrus Cox, of High Point, N. C., and wife of the genial postal clerk on the Asheville branch of the Southern railroad, after suffering with ill-health for nearly seven years, and being under treatment by various doctors of medicine for four years continuously, says: "I am thankful to the Lord for having directed me to Professor MacKnight and his treatment for consumption, at the Hamner School of Science and Healing, High Point, N. C."

I have been treated by some of the very best physicians I could obtain for the last four years. Some said I had consumption, some said consumption of the bowels, some consumption of the kidneys, others said I had also liver trouble, stomach, bowel and kidney trouble combined.

I do know that I suffered with night sweats and a nasty cough; there were liver spots on my face, pain through the kidneys no appetite, and when I did eat anything I suffered excruciating pain and misery. I could not sleep at night and I was so weak that I could hardly cross the room without some kind of assistance. I was reduced in flesh from 186 to 108 pounds. Nothing passed my bowels but bloody mucus. I suffered terribly with my head, and gave up to die.

From all the doctoring I did I could not obtain relief. On November 5th, 1900, I began treatment with Professor MacKnight, of the Hamner School of Science and Healing, at High Point, N. C., and I took twenty-six treatments in seven weeks. I now have no headache, no pain; have a splendid appetite, stomach sound, liver spots all gone, no blood or mucous passing the bowels; sleep well, night sweats stopped, no cough, no pain or soreness in liver, stomach or kidneys; food digests well, feel well and strong, and now weigh 119 pounds. I feel that I am cured.

I can say, further, that the treatment given by Professor MacKnight is pleasant and agreeable to take, and he uses no drugs."

The following professional statement was made by Professor MacKnight concerning Mrs. Cox's case:

"On November 5th, 1900, I found Mrs. Cyrus Cox suffering greatly from a complication of diseases. I could not find a normal organ in her body. She was greatly emaciated and very weak. Many a good physician would

have pronounced her case one of consumption. She had all the symptoms of consumption and several others besides. Her condition was: Pulsation, 126; respiration, 42; temperature, 101.6. After six weeks' treatment she was perfectly normal in every respect. Night sweats left the first week, cough left the second week. I consider it a case of consumption cured."

It should be said that it was at the sincere request of Mrs. Cox that her case is placed before the public. She says that she wants every sufferer with consumption, or otherwise, to know where and how she obtained relief, and cheerfully recommends Professor MacKnight's treatment to all.

Bad Habits Cured.

The greatest menace to society and the greatest curse to the young man of this age of progression is the acquirement of such habits as the morphine, tobacco, liquor, cocaine, opium, and a host of other habits equally as obnoxious and damaging to the system as well as their propensity to detract one from social circles and business affairs.

These habits are easily cured, and one who is addicted to any one or more of them can be easily cured thereof. The Hamner School of Science and Healing of High Point, N. C., is the only institution that effects absolute cures of these habits and makes their cures permanent in this part of the country. Many people of High Point can and will cheerfully testify to the efficacy of their treatment, and all join in saying that now after taking their treatment that they hate the drug they once loved and feel that the evil effects they once felt from it are all gone and they are fully restored to their natural self. Whole families have been cured by Professor Mac Knight in a very short space of time, and the cures made permanent.

A few of these patients who testify to the effect of this treatment will no doubt suffice to readers.

Mrs. S. Beam, of English Street, High Point, says: "I am now fifty years old, and have been an inveterate snuff user every since I was twelve years old. I loved the drug so well that I often left the table while in the midst of a meal to go and take a dip. I was not myself unless I had my brush in my mouth all the time. I just thought it impossible to live without it, and when Professor Mac Knight told me that he could cure me of the habit I laughed at the idea. I thought it impossible. Three or four days afterward I thought my snuff did not taste just right. I tried it again and again every time it got worse. I sent to the store for some new, thinking that would be better. I tried that and it was worse than the other. It tasted just like rotten wood as near as I could make it out. The next day I tried it again and again and it got worse than before. It began to make me sick. I was so lonesome for a few days that I felt as though I was lost. Then I began to feel like my old self again but I could not bear the thoughts of using snuff. It made me feel so sick to even think of it. I now realize that Prof. Mac Knight has cured me of one of the filthiest habits a woman can acquire. I feel all right, hearty, healthy, and happy, but I hate snuff. I would ask all my sisters who have acquired the habit, or any other habit, to try Prof. Mac Knight's treatment and they will sing their praises of thanks the remainder of their life."

There are more than twenty persons right here in High Point, who have been cured of filthy and bad habits by Professor Mac Knight at the Hamner School, and any of them can be seen by simply asking.

Magnetic Massage.

It is a settled fact that there is no therapeutic agent known that will combat and overcome Consumption as the Magnetic Massage will. A massage is the scientific working up of every muscle, ligament and fibre of the body. When disease, whether Consumption or any other, attacks your body there is no danger from it providing your system is in a natural, healthy condition and you care for it, nourish and protect, and exercise it as when in perfect health.

A working and stretching and expanding of the tissues and muscles is always necessary to a healthy condition and it is when you neglect these, and then abuse yourself by exposure, and so forth, in that you open the door to the ravages of such disease as may be seeking for admission to your system. If disease has already gained admission then it is that a scientific massage will begin to repel it and restore you to your original condition. That a person may give massage treatment effectually he or she must have a thorough knowledge of the anatomy of the body, otherwise they might do more harm than good. Magnetic massage is the giving of massage with the magnetic hand, that is with the hands magnetically heated. Professor MacKnight gives magnetic massage with his hands at a temperature of one hundred and ten degrees of magnetic heat. This is not a heating of the hands by the fire or by any artificial means, but a natural magnetic heat of one hundred and ten degrees. Let some person afflicted with consumption or any other trouble imagine how invigorating it would be to their cold clammy bodies to have instilled in them a healthy heat of one hundred and ten degrees. And if they are suffering with a fever heat of say one hundred and three, let an healthy magnetic heat of one hundred and ten be instilled into their system and their temperature will come to the normal point in short order. A perfectly natural heat of one hundred and ten will destroy an unnatural or fever heat of one hundred and two, three or even five degrees. This is common sense and if we use a little more of good common sense in the treatment of disease we would not suffer so much. The testimonials given in this paper of those who have suffered for years and taken loads of drugs and truck ought to satisfy any one. But in case it does not come and try our common sense treatment and see for yourself. We cure and that is all there is to it, and we do it without any drugs or artificial means. We use nature, and nature alone can cure disease.

The Hamner School of Science and Healing, High Point, N. C., will give any person fifty dollars for a case of stomach trouble that they can not cure in thirty days.

A Message from One Who Knows.

"I want to say to all of my friends as well as those who are strangers to me," said Mrs. Joseph R. Haden, of High Point, N. C., "that I have suffered with a general consumption of the entire body for five years, and have been under the continuous treatment of four different doctors of medicine during that time up to the first of the present year. About four weeks ago I heard of Professor MacKnight's wonderful cures and after talking it over with my hus-

band concluded to try his treatment. It seemed strange to us that he could cure disease without medicine, as we have always used medicine to cure disease. My doctors of medicine told me that they could not help me and there was no remedy for my ailments. I had constipation in the most malignant form and had suffered with it for five years. I could not eat because of the bad condition of my stomach, and a good night's rest I had not had for years. I had cold feet all the time and it seemed that fire would not relieve them. For the last two years I suffered with spinal trouble and severe headaches, and had a cough nearly all the time. I was reduced in flesh to nearly one hundred pounds, from one hundred and thirty, and could scarcely stay out of bed a whole day at a time. I also suffered with womb trouble and could not get relief. I have now closed the third week of treatment with Professor MacKnight of the Hamner School, at High Point, N. C., and am so much improved that I feel the best that I have felt for over four years. Up to the time that I began taking treatment of Professor MacKnight I was addicted to the use of snuff, and thought that I could not live without my snuff. For one week now I have not used snuff and I now hate it as bad as I loved it before I took Professor MacKnight's treatment. After the first treatment by Professor MacKnight, my bowels have been perfectly natural and this is the first time that has occurred in five years, I never got even temporary relief from the use of medicine. I was always worse after taking medicine. I wish I had nothing to do but go out and tell the poor sufferers that are being fooled as I was with the use of drugs, how easy it is to be cured without drugs, and at a very small expense, by professor MacKnight and his assistants at the Hamner School. I have now gained ten and one-half pounds and I feel better than I have for five years. I did not know that Professor MacKnight was treating me for the snuff habit until I began to dislike snuff, and then I wondered what was the matter. The Professor then told me, and since that time I have not used snuff in any form. I now hate it. I would advise all who are in any way afflicted to take their treatment, as it is simply wonderful, and its results are grand."

Another Case Worthy of Note.

Mrs. Kidd, of High Point, N. C., says: "I am now sixty seven years old and have been treated for the last twenty-five years by eleven different doctors of medicine. Several of these physicians told me that I had and treated me for consumption. I had a bad cough, suffered with night sweats, cold feet, both winter and summer, constipation of the very worst form, kidneys always bad, stomach caused excruciating pain. Doctors said I had enlargement of the liver, and I scarcely ever received any relief from the treatment that they gave me with medicine. I was reduced to 90 pounds January 1st.

On the fourteenth day of January, (inst.) I began treatment with Professor Mac Knight of the Hamner School, of High Point, N. C., and have now closed the third week of his treatment, having taken eighteen treatment up to this time. My condition at the present time is so much improved that I feel like a new woman. After the third treatment I have not even felt the effects of constipation. My bowels are perfectly regular and easy. I sleep well now and that is some-

thing I have not done for over twenty years. I have no night sweats, and my feet are perfectly comfortable. I eat all the ordinary food that poor people have to eat and my stomach is perfectly easy, the best it has been for twenty years. My appetite is excellent. My kidneys are perfectly normal, and my cough is nearly all gone. I do not cough at all at night which has for years been the worst time for it. I feel younger now than I did when I was forty years old, and now I am way past the half century mark. Last month I thought and so did my friends that my time for this world was short but now I feel good for a long time yet. I want to say to everybody who is suffering with any form of disease that Professor Mac Knight cures without any form of medicine and his treatment is pleasant to take. He cures and that is all there is to it. I have now gained four pounds in three weeks, and I cheerfully recommend him to all."

A Cancer Cured.

Samuel Taylor, of Progress, N. C., had been treated by the local physicians for nearly five years, for consumption of the bowels and cancer of the right groin. He also attended the John Hopkins hospital of Baltimore, Md., and in every case was sent home to die. They all pronounced his case beyond help, and said that nothing but death would relieve him. During the month of November last he went to the Hamner School of Science and Healing, for treatment, and after taking thirty-five treatments as given by the system of Professor Mac Knight, is now well and sound as a dollar, except the knots that formed from the incisions made by the knife of the surgeons who cut the cancer at the different places of treatment. At the Hamner School there was not one solitary bit of medicine used, or the knife, as they have no use for either. Nothing but Natural Science did it, and it will do it every time.

Lecture.

Randleman, N. C., Jan. 28. Editor Enterprise:—The people of Randleman were given a rare treat on Saturday evening by Professor Mac Knight, of the Hamner School of your place. The Professor delivered a lecture on "The Healing of the Sick in the Twentieth Century," and to say that he gave some new and grand ideas is putting it mildly. He demonstrated the utility of hypnosis as a curative agent by put-

ting his subject, who was a boy of this place, into the various stages of hypnotic sleep. The mayor and principal of our school, together with Drs. Woollen and Walker, made careful investigation of all he did, at the request of Professor Mac Knight, and found it to be genuine. Dr. Woollen held his own clinical thermometer, and Professor Mac Knight, with nothing but his own bare hands, produced a magnetic heat that drove the thermometer to the 110 degree mark.

All our doctors who were there admit, reluctantly, that his demonstrations were simply wonderful and no doubt open a new era in the healing of disease. Dr. Woollen said himself that a natural magnetic heat of 110 degrees would certainly overcome and destroy an unnatural or fever heat of any degree lower than that, and 105 is the danger point.

The lecture was given in the Odd Fellows' Hall and the hall was filled with the best and most popular ladies and gentlemen of our town.

The favor with which Professor Mac Knight's lecture and new science met with here certainly calls for another lecture. Professor, your presence and a further demonstration of your science is demanded.

The Why and Wherefore.

Editor Telegram:—I have been repeatedly asked how and upon what theory our treatment cures diseases and habits. I feel that I may be doing our readers a kindness to set forth briefly in your paper the "why" of these results. That the results are very gratifying is beyond question and when I look over the once desolate homes that we have made happy it does my heart good to think that we are in possession of such a grand science and can use it to benefit suffering humanity, as well as teach it to others.

The theory of our science is this, briefly stated: The law that controls our personal magnetism is that natural law known as the law of vibration. We find that the movement of all atoms is a vibratory one, and so extremely rapid that, in a designated time, is capable of attaining a number of vibrations that is almost incomprehensible to the human mind. We learn that there has been recorded by our fathers of science a table showing the lowest vibrations of any movement of atoms to be two vibrations a second, and on up to almost numberless numbers. Thirty-two per second produces the lowest sound that can be heard by the human ear, and 32,768 per second produces the highest sound that can be distinguished by the human ear. Then we learn that 1,048,

576 is the lowest, and 34,359,738,368 per second produces the highest sound that can be distinguished by the human ear. Between these two we tune the wires of the piano and the strings of other instruments and produce any pitch or tone of music that we wish. Then we have a production of 33,554,432 as the lowest, and 34,359,738,368 as the highest vibrations per second that occupies a space that produces electricity. From these last vibrations electricity is produced in its lightest and heaviest forms. The next we find recorded is 1,099,511,627,776 as the lowest for this step and 35,184,372,088,832 vibrations per second as the highest. This step produces something that has not yet been fully determined, but that it produces some force and that which is more subtle and powerful than electricity to the scientific mind. Then we have another step that produces a maximum vibration of 36,028,707,018,963,968 vibrations per second, and yet another one that produces a maximum vibrations of 2,305,763,009,213,693,952 per second. It was nearly at the last that Roentgen, the great German scientist, produced the renowned X-ray. Now we have loosely run over the extent of the movement of atoms per second by force of the law of vibration. Now when we look upon the human body—a mass of atomal matter—governed and controlled by this law of vibration, we cannot help but wonder what effects could be produced by this law if it was made use of as fully as the human mind might make use of it. Vibrations produce light, for example, four hundred and fifty trillion vibrations per second produces red light, while seven hundred and fifty trillion vibrations per second produces violet light. Yet these are very common to us. Now all atoms of whatever nature vibrates. Our bodies are in a stage of vibration all the time. This vibratory movement of the body produces results that are well known to the most ignorant person. If one is out in the cold and becomes uncomfortably cold and chilly, he will instinctively whip his arms and shake his body to warm himself. Now what does he do? Simply calls upon the natural law of vibration to increase its vibratory movement and thereby produce heat; he becomes warm, thereby. This law of vibration is not carried and conducted by the atmosphere we breathe, but has an Universal Ether of its own, which conveys, transfers and controls it. The theory, as I have said, of our science is based upon this natural law. The influence that one person has over another is the effect of their Personal Magnetism conveyed upon this Universal Ether to the other person, and this influence, or substance, is finer than air, more subtle than thought and more powerful than elec-

tricity. It is the Magnetic Electricity of the human body, and is used in various ways, and may be used almost without limit in extent and variety, as we progress in knowledge in this life. Some ask, "how do we know that this Personal Magnetism exist?" This is very easily illustrated by a few common place incidents. Go in a car filled with people, a church or any other place and take a seat in the very rear part of the building, and look intently and steadfastly at the back of the neck of any person in the place, and couple with your gaze the thought that he or she will turn around and look at you, and in less than five minutes that very thing will occur. What does it? Your own personal magnetism is conveyed to the person upon the Universal Ether, and the vibrations of it attracts their own self, and they look to see what calls them. Again your friend has had a long ride today in a cold wind, and as a result has neuralgia in the face. Your friend's vibratory system is low, cold has entered, and pain the result. You wish to relieve him of the pain. You know these things. You at once set about to increase the vibrations in your friend's face, this creates warmth, not of an artificial nature, but of a natural kind, and the pain leaves—nature expels it—you merely assist nature. This personal magnetic influence may be exercised at a distance as well as in close proximity and what we will do with it in the future remains to be seen. That we cure disease with it now is certain.

Our science is nature's own mighty work, and we are the agents put here by our Creator to make use of it just we make use of water, air, electricity, the mind with which we think, and many other natural forces. Every part of our being, every thought we possess, every atom of our bodies, as well as all creation, is directly under the control of this grand and mighty law. When we rebel against it we fight and combat one of God's inflexible laws, and it is because of our ignorance that we do so. Never did a new discovery of Natural Law or Science come to light, but what the old school ignoramus fought against, and tries to set up their own insignificant ideas in the place of Natural Law.

We now have a science of Natural Law with which we combat disease, and that successfully, too, in the place of the old, or artificial one of medicine; and common sense tells us that we prefer natural means to artificial ones. We drive out pain with the infusion of Natural Magnetism and heat, while the old way is to give a dose of morphine to paralyze the nerves so that you cannot feel the pain, and then take your chance on becoming a morphine fiend. Which is the best? Let common sense answer. No one will dispute the power of electricity, yet if

you had told our forefathers fifty years ago that such wonders lay in the natural force of electricity that was stored up for man to develop, one would have pronounced you insane. But now we have it in many forms, and powerful enough to do most anything with.

Yet we find that Personal Magnetic power is of a much finer and higher order of forces than electricity, and is, therefore, more powerful and potential than that much used force. Both come from the natural law of vibration only. Personal Magnetism is of a much finer and higher order, as I have said. Why do the physician use so many forms of electricity with which to treat patients, when they possess a natural magnetic battery in their own bodies, that is many times more powerful and natural than the battery made by man. All they need to do to cure with the use of their own bodies is to learn how to control and generate their own magnetic force and impart it to others. The day is not far distant when every person will be their own magnetic battery, and such a thing as artificial means will be a thing of the past, and we will look back to those old school ways as the products of ignorance. WE MUST YIELD THE ARTIFICIAL FOR THE NATURAL.

Mr. Editor: This is only a glance at the science we teach and practice, and space will not permit of a full exposition of our grand and noble cause. Let us hope that the future will bring forth further developments, and even if it does call the lovers of the old way from their old beaten path, let us hope that they will take the step and be progressive, as we must progress if we wish to advance in knowledge. A fair trial and a full investigation is all we ask. Give us that trial.

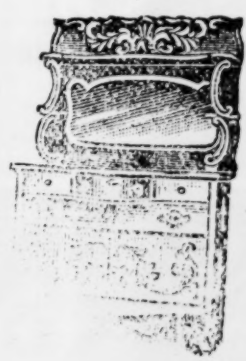

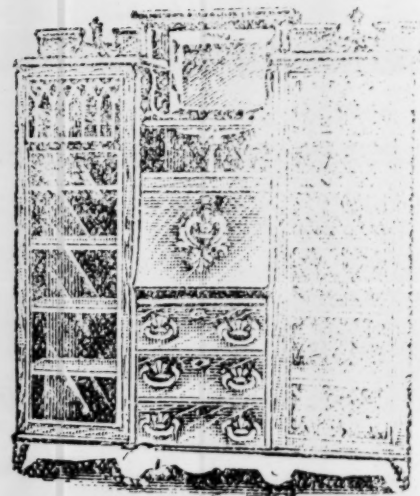

Yours truly,
HARRY MACKNIGHT,
Professor at Hamner College, High Point, N. C.

PARALYZED WHEN BUT THREE DAYS OLD.

Little Daisy Beane, of High Point the Most Unfortunate Victim.

As published in The Enterprise of Jan. 4, 1901.

Now twenty-two years old and never took a step in her life, confined to her one little cradle all these long years. Such is the history in brief of the only child of W. S. and Mrs. Beane, of High Point, North Carolina. Little Daisy (as the unfortunate child is known), when but three days old, suffered a severe stroke of paralysis of the left arm and side. She was one of a pair of twins, a boy and a girl, the boy dying when but a few hours old. The little sufferer was doomed to greater suffering than mere paralysis, as, when she was but three weeks old, her parents and the physician in charge noticed that her head was enlarging, and this was immediately fol-

There is No Use Waiting For Things That are Here = = !

This store is full and running over with all of the newest and latest designs that have been arriving for the past two weeks. Owing to a decline in the price of raw material entering into the construction of furniture, these new artistic designs can be had for much less money than you can purchase the old designs even at a reduction sale. The extra floor space now in use enables me to offer for your inspection the largest stock of fine furniture that has ever been shown on this market. Don't throw your money away on old goods when you can buy new for less.

HAMNER SCHOOL OF SCIENCE

(Continued from Page 7.)

lowed by an opening of the fissures of the skull, and her head enlarged to the enormous size of thirty-two inches in circumference. But that was not all. She was soon thereafter thrown into spasms, which she has suffered with nearly every day of her life. These spasms became so acute that they threw her into all sorts of contortions, and her face would be so drawn out of shape during their continuance that it would be impossible to recognize her by her features.

Physician after physician called to see her, and some of the very best medical talent in America came hundreds of miles to make a study of the case, because of its being unparalleled in the history of medical science. Professors and doctors and surgeons from the best universities and hospitals in America spent much time in watching and investigating the case, but only with the sad, sad result that they could in no wise relieve the little sufferer. Little Daisy, when not suffering with her periodical paroxysms, developed quite bright intellectually and looked upon her condition quite philosophically. Every professor and physician and scientist who ever saw little Daisy, while not being able to do anything to help her themselves, universally declared that there was something that would help her. Not until October last did this "something" come to light. On Sunday, the 28th day of last October, the father of this little sufferer, never giving up in despair of her relief, called in Professor Harry MacKnight of the Hamner School of Science and Healing, of High Point, he having just come from New York to take charge of the Hamner School. Professor MacKnight made a most careful diagnosis of the case and found the following conditions to exist: Head, 31½ inches in circumference, pulsation, 120 per minute; temperature, 95.6; respiration, 42; child perfectly helpless—could not turn her head on the pillow without assistance; arms, legs and body all drawn out of shape; appetite abnormal; extreme nervousness and an average of three spasms each day.

He began treatment at once by hypnotism. From day to day he added the following treatments: At the beginning of the second week he added Magnetic Treatment; second, Psycho-Therapeutics; third, Suggestive Therapeutics, and fourth, Massage.

Now the ninth week is closed and little Daisy is in the following condition: Head measures 24½ inches in circumference, a reduction of 7½ inches; sleep perfect; free from nervousness; appetite moderate; spasms, not one a week and very light; can move head at pleasure and raise it from the pillow without any assistance (something she had never done before in her life); temperature, 98.2; respiration, 22; pulsation, 74. It will be remembered that Professor MacKnight is introducing his new system of treating disease without medicine. He was for 6 years a practitioner in medicine (regular) in one of the large cities of the north, but some four years ago conceived the idea that disease could be cured by natural means, without medicine, and set himself at work on these lines.

Ladies:

Owing to the disagreeable weather our sale of silks will be continued. Just half price is the way they are marked. Those Lace Collars and Boleros are just in. See them

S. L. Gilmer & Co

Since coming to the Hamner School Professor MacKnight has cured and discharged one case of consumption in High Point that had been given up and pronounced hopeless by physicians; one from Randleman, and one from the country south of Archdale. Here are three consumptives cured right here at home. One case of tumor removed completely without the use of the knife. One case of chronic catarrh from Randleman. One case of chronic catarrh from Julian. One case of apoplexy in High Point. One case of chronic neuralgia, and one case of chronic heart trouble, two cases of chronic stomach trouble, one case of lost vision, and several cases of habit, all in High Point. The Hamner School and its professor never publish names of patients, although they joyfully declare they are willing that their names go forth to the world, but if any person would like to know and see these patients Professor MacKnight will cheerfully escort you to them and introduce you. There is no objection to this. We invite this.

It should be said that the science of healing instituted in the Hamner School by Professor MacKnight is one of perfect natural science, and cures disease without the use of knife or drugs. Students find it not only interesting, but a pleasure to relieve suffering humanity with ease. All habits are easily cured. Professor MacKnight's theory is something like this: That disease is an unnatural condition; natural or healthy conditions will alone overcome unnatural and diseased conditions. That God the Creator has produced in abundance these healthy conditions, and so long as man keeps within these natural conditions he remains well and healthy, and if he gets out of line with them and becomes unhealthy and unnatural, all he must do is to get back into the natural conditions, and he is again well. It is along these lines and upon this theory that Professor MacKnight has evolved a natural cure for unnatural disease. During the past three and one-half years he has treated by his new system five hundred and thirty-seven patients and only lost by death two of them, a record not to be easily beaten. Good students are in great demand. The School could use several at once.

PERSONAL MAGNETISM PROPER Or the Magnetic Control of Others.

A new book on an old subject, but containing new rules for the acquirement and development of that wonderful power in man, Personal Magnetism. There is no fact better known in scientific circles than that Personal Magnetism is the power that brings man or woman success in any undertaking in life. There are scores of books and magazines annually cast upon the market telling us of the wonderful powers of this mighty agent—Personal Magnetism and not one has ever been offered that tells us how to acquire this wonderful power.

Professor MacKnight, principal of the Hamner College, of High Point, N. C., and a recognized authority on occult science has just completed a neat little volume, containing one hundred and one rules covering every phase of this subject, and which is welcomed by every scientist in the world, has supplied the profession with a work that contains the gist of years of active experience in any phase of the acquirement and use of Personal Magnetism. The country is full of schools and professors who teach the use of this power, but no one has, or can tell us how to acquire and develop this great power.

This is just what Professor MacKnight's little book does. It is needed by every library, professor, teacher and student. The practical operator ought to be in possession of every rule laid down therein, as they are of daily use.

By the use of these rules a person may, although he or she may appear to be devoid of this power, acquire and use it to the greatest advantage. By the use of these rules one may acquire and use Personal Magnetism in an almost unlimited degree.

Some of the things that may be acquired and made use of by this little book are the following: It will make the poor lawyer a good one; by means thereof the lawyer wins his jury and convinces the court. It is the power by means of which the public speaker pleases and holds his audience. It is the power that makes the unpopular preacher popular, and by which he holds his congregation. It is the power that makes a poor salesman a good one. It is the power by which the successful teacher rules and con-

controls his students without rule or rod. It is the power that makes one healthy and popular. It is the power of success and upon which every successful person depends, either consciously or unconsciously.

The first edition will not last long, and a second edition is demanded. The first edition has been selling for five dollars but the second will be sold for ten dollars. Order now and secure one of the first as there will be no deviation in price.

One of these in your hands and used means health, wealth and success.

Address The Hamner College, High Point, N. C.

The Hamner School of High Point, North Carolina.

The Hamner School of High Point, N. C., is a college for the education of men and women in the science of Healing the sick without the use of medicine. The regular course consists of four special ones, any of which may be taken separately, or any two or more may be taken, or all may be taken making the regular course. The entire term consists of six months, and any one of the special terms consists of six weeks. The tuition fee is fifty dollars each for the special terms, or two hundred dollars for the general term and course.

The first term consists of Anatomy and Diagnosis. The second term consists of Psychology and Mental Philosophy. The third term consists of Metaphysics, Hypnotism, Mesmerism, and Massage. And the fourth term consists of Personal Magnetism Proper, the Magnetic Control of others, and Practice. All students are furnished employment in the work of their profession as soon as graduated. All our students are competent to cure disease without medicine, and we assure them success, providing they take the entire course, and we will guarantee that they can do everything that we can do, if they will only try. We have some graduates who are performing some of the most wonderful cures that ever were known, and they astound the world. Our science is a perfectly

natural one and any form of disease chronic or otherwise, as well as habits are easily cured. Many students are simply astounded at their own work, and surprise their friends with their work. Our women students find a very profitable work and a pleasant one too in the treatment of diseases peculiar to women. All forms of female trouble cured in a very short space of time, and all our cures are permanent.

We can use several good students at a good salary now, as our work for the sick is now increased to such magnitude that we must have more help.

We are the only college in this country that furnishes our graduates with profitable employment as soon as they are graduated. Some of our graduates are making a splendid salary working for themselves. A new class will be opened for the spring and as we have had so many applications for a night school that we have concluded to inaugurate a night class for the benefit of those who cannot attend in the day time, so as to give all the same chance. Board and rooms for both patients and students furnished on application, at very reasonable terms.
